
Percentages

Posted by D.R. Harrison - 2009/10/27 13:54

I have a dimension where I want to show for each item what percentage it is of the total. The problem is there are alot of items in my dimension and I don't want to have to make up 37 groups. Is there an easy way to create percentages in the Builder?

You can create the percentages by going into "View" then select "Distributions..".

The new table will allow you to browse the different distributions (Percentage of Column Total, percentage of Row Total, etc.). And since it does so by creating a new table, it won't affect the existing table.
